FOREWORD

The Juniors, as editors of this week's Booster, hope that you may find something of interest and pleasure in it. They trust that you may find some "real live" news of our "real live" school.

HIGH SCHOOL TUTTION

Should high school tuition be abolished? We think it should. Why? Because there should be free schools as well as other things. The fact that pupils are required to pay tuition does not keep many pupils away. But is that any reason why talk. they should pay it? No. The tuition was raised last year but practically as many pupils came to A. H. S. as before.

People from out of town do not have to pay to come to town to church or to trade. Why, then, think everyone should have an tuition was abolished.

A NEW HIGH SCHOOL

when they are cold, all huddled up in one corner? They squeeze close together using every bit of space and they are continually moving about and rearranging themselves so that they can use the space they have to the best advantage. We are just as crowded in the high school. as a bunch of chilly chicks. We do the best we can with so little room, but if we had a larger building we could do much more work in more healthful way.

In nearly all of the class rooms there is not enough of the regular class room seats, so folding chairs are set around the room. These chairs are not very comfortable, and furthermore they do not have the desk-like arm on which to write. In the science laboratory, there are no chairs, only long-legged stools. When a student sits on one of these stools for an hour and a half at one time his legs go to sleep, his back nearly breaks, his head just about splits, and he loses all his good humor. The study hall is so crowdtheir wraps in the hall and a coat pleted.

Mr. Went-And-Cut-It

The New Plan Corn Cure That's as

Sure as the Rising Sun.

"Glad to ment you!" says the razor to the corn. "Fil bleed for you!" says the corn to the razor. Razors and corns love each other. Corns love to
